

PIP FINDS A PATTERN

Point, guess, and draw what comes next!

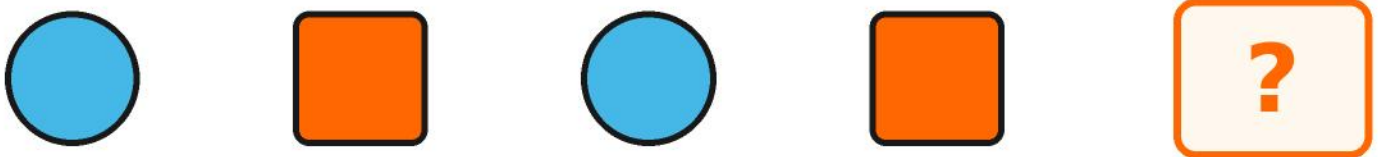

PATTERN 1

PATTERN 2

PATTERN 3

GROWN-UP PROMPT

Ask: What do you notice? What do you think comes next? Why?

GROWN-UP GUIDE

THE LEARNING IDEA

Patterns help children predict what comes next. This builds early reasoning skills and creates a natural bridge to understanding how AI learns from examples.

Try these prompts:

- What do you notice?
- Can you point to the part that repeats?
- What comes next?
- Can you make a new pattern with toys or snacks?

Keep it playful. There is no need to explain algorithms. The goal is to notice, guess, and talk together.

Safety: A grown-up should handle scissors or any small loose pieces.

YOU IMAGINE. PIP HELPS. WE LEARN TOGETHER!

PIP'S BIG FUTURE
